

Getting There

St Clair Lagoon is 180 km north west of Hobart via the A10 Lyell Highway.

Background

St Clair Lagoon is a flooded complex of natural lagoons, marshes and channels. The water levels can fluctuate dramatically. At normal levels the large main lagoon consists of weedy marshes along the western banks and open wadeable flats over the eastern half. Both Lake St Clair and St Clair Lagoon are within the Cradle Mountain, Lake St Clair National Park. Park fees apply and Park Passes are to be displayed on vehicles and boats. Park Passes are available from the visitor's centre at Cynthia Bay. Foot access for anglers beyond the Pumphouse Point gate is via the Fishermans Trail.

Recreational Fishery Management

St. Clair Lagoon is managed as a wild trout fishery with naturally recruiting populations of both brown and rainbow trout.

To protect the unique flora and fauna these waters are reserved for artificial lures and flies only, bait fishing is not permitted within National Parks.

Angling Notes

The lagoon is renowned for tailing fish during periods of high water and consistent hatches and polaroiding throughout the summer months.

Code of Conduct

- · The Pumphouse Point road, buildings and flume are reserved for
- Fishermans Trail.
- · Respect the rights of other anglers and users.

Pest Fish Management

Anglers can help reduce the spread of pests in Tasmanian waterways. It is an offence to use fish or fish products for bait or to transfer fish between waters. Significant penalties apply.

> Report any unusual fish captures or algal sightings immediately to the Inland Fisheries Service

Report illegal activities to Bushwatch 1800 333 000
